Sign Language & Linguistics aims to increase our understanding of language by providing an academic forum for researchers to discuss sign languages in the larger context of natural language, crosslinguistically and crossmodally. SLL presents studies that apply existing theoretical insights to sign language in order to further our understanding of SL; it investigates and expands our

knowledge of grammar based on the study of SL and it specifically addresses the effect of modality (signed vs. spoken) on the structure of grammar.

As of volume 7 (2004) *Sign Language & Linguistics* appears in **electronic format only**. The inclusion of video and the use of PDF with its facilities for searching and retrieving texts, hyperlinks and so forth add value to this electronic edition.
